Milling table

for the milling of geometric shapes or figures of irregular section in wood, plastics and aluminium.
The sheet material can be milled through, but shallow recesses are also possible.
Engraving, chasing, etching or fully 3D moulds are perfectly feasible.

The milling table is provided with a modern and flexible CNC-control. A powerful industrial PC with 15" TFT monitor is included.

The milling machine motor is surrounded by a detachable brush; a professional dust extractor can be coupled onto this brush.

A compartmented vacuum-suction system is included as a standard.

Option : spray-mist cooling system for the milling of aluminium

Option : automatic tool changer

Technical specifications:

Type	M1010	M2010	M2512	M2515	M3015	M3020
• Milling range						
- X (mm)	1000	2000	2500	2500	3000	3000
- Y (mm)	1000	1000	1250	1500	1500	2000
• Total length (mm)	2350	3350	3850	3850	4350	4350
• Total width (mm)	1785	1785	2035	2285	2285	2785
• Clearance below bridge (mm)	150	150	150	150	150	150
• Milling machine motor	2,2 kW (3 hp) at 24000 rpm. The work speed is adjustable (0 - 24000 rpm). Compressed-air cooling system for soundproofing.					
Other technical specifications or information about any other possible execution, will be submitted upon request.
